

CUTTACK MUNICIPAL CORPORATION

Ref : 1188.....

Date : 07/02/19

OFFICE ORDER

Bill files relating to desilting works are being received at this end one by one. Since, I have no personal knowledge about the execution of the work and these works are earth works should have been check measured before the last rainy season. It is difficult to know from the file whether actual measurement has been taken prior to the last rainy season. It is also observed that works wherever measurements were taken prior to the last rainy season are being submitted for payment at delayed stage. This goes to prove that actual measurement has not been taken at that time and the measurement now taken to MB are only manufactured and without reference to the field. Contractors are time & again coming to the table and pressing hard for payment. For settlement of payment, it is now ordered that all bills relating to work done on desilting during the last rainy season shall be submitted in toto at a time for taking decision whether payment can be considered or not.

The Engineering Section is also informed to submit a list of projects immediately, where measurement has been taken and why the bills have not been submitted if measurement is taken. They shall also communicate all contractors to intimate the Commissioner directly if any bill regarding payment of desilting work is pending. Under no circumstances, bills relating to desilting work shall be submitted one by one. All the bills shall be submitted by the end of 15th February, 2019 so that the same can be cross checked by deploying officers and after 15th February, 2019 no such bill shall be taken into consideration for payment.

Memo No. 1189 /Date 07/02/19
City Engineer/Executive Engineer-I/Executive Engineer-II/Dy. Ex. Engineer(s)/All
AEs/JEs, CMC for information and necessary action.
